XMT-1500

AUTOMATIC SHUTTLE MAP/GAS FLUSH HEAT SEAL MACHINE

The 1500 series Gas Flush Heat Seal Machine is one of the most economical MAP/Gas Flush machines ever produced. This machine runs totally off of 110 volt household current thereby eliminating the need for compressed air. This creates substantial cost and space savings for our smaller customers by eliminating the need to buy and store air compressor and regulator equipment. This machine is the most affordable solution available today for you to enter into the MAP/Gas Flush market. Save both money and space while extending shelf life and freshness!

FAST

- Automatic feed and seal feature
- Display shows number of cycles sealed in shift
- 5 minute warm up time
- Simple pocket and die change over
- Seals up to 8 cycles per minute, depending on tray size and material

VERSATILE

- Interchangeable pockets and dies
